

The download – as of February 2011

All files for the written and audio material of the six Modules of **The NEST** are stored in folders on a **free version of Box.net**. **You download individual files. You have to click on each folder to access the files** – you'll know when you have reached the right point(s) as the word 'download' appears beside the files.

You just click on download and save each file.

The full set of materials comprises a lot of files (see list below). The materials are free – you just need a little patience to get them! That's why our advice is to check first whether you need all or just some of the Modules / units by reviewing the syllabuses and sample units on our website.

Details of what's stored on Box.net

Two folders: **The NEST Modules 1-3** and **The NEST Modules 4-6**.

The NEST Book 1 (Modules 1-3) Click to open

You need to download the 01.start file then open the folder for whichever module(s) you want.

For Modules 1 - 3, each audio track has a unit of activities on it. You therefore need to use the **CD timings sheet** in the teachers' notes, to locate individual activities – downloadable from here or our website. This also provides Unit by Unit notes.

The NEST Book 2 (Modules 4-6) Click to open

You can now download all the written material and then open the **NEST Book 2 recordings** for the audio material.

There is an audio file for each activity. This makes the recordings very easy to use in class but means there are more files to download.

You can download in CD format or MP3. The MP3 format includes recordings of the Reading Texts in each unit; the CD format does not, so there is a separate folder of Reading Text recordings.

For the students' material, you can choose to download:

- Modules 4-6 as a single Pdf file
- Each module separately
- Any unit.

If you only want a single Module or Unit, open the "Downloads of separate ..." folder.
